

Safe Flight School, Empuriabrava S.L

Welcome to the Safe Flight School, Empuriabrava. Thank you for your enquiry.

About the Safe Flight School, Empuriabrava S.L.

The Safe Flight School, Empuriabrava is owned and operated by Brian Vacher and Reinier Bos. The School is open 365 days a year, based at Skydive Empuriabrava, north of Barcelona, Spain. The combined knowledge, experience and passion of Reinier Bos, Brian Vacher and Bruno Brokken as canopy pilots and instructors makes Empuriabrava the location for canopy training in Europe. The school was established from the two biggest canopy schools in Europe, The Safe Flight School and The Canopy School, Empuriabrava. To date the school trains more than 300 people per year in all aspects of canopy flight.

About the Courses:

The Safe Flight School Canopy Courses are tailored canopy control courses suitable for all levels of experience from AFF graduation through to experienced jumpers with thousands of jumps. The course chosen, exercises and training will be related to your experience level. Courses are available in Catalan, Dutch, English, French, German, and Spanish.

Different Courses:

The student has a choice of various different packages, which tailored to the individuals canopy handling experience. The information below is an outline. Should you have further questions please email the school at info@safeflightschool.com or call the Safe Flight School on +34 697 555 774.

[General Canopy Handling Course – 3 days]

The General Canopy Handling Course covers the basic theory necessary to understand canopy flight improve the students skills.

It consists of basic aerodynamics; an introduction to a safe and effective landing profile; flight planning and basic accuracy; and canopy discipline.

The practical section of the course consists of 10 supervised jumps working through a series of basic exercises, that the student is asked to perform under their canopy. During the course the student will perform each exercise at least once so each exercise is understood.

Further ground school modules are completed, covering canopy dive flows, logging of the information collected, and choosing a canopy. The student is also introduced to the further 8 more technical, but essential, in air exercises.

[Advanced Canopy Handling Course – 3 days]

A minimum skill level and experience is required for this course. Please contact info@safeflightschool.com for details.

The Advanced Canopy Handling Course introduces the student to advanced accuracy, in air exercises and high performance landings.

The practical section of the course consists of 10 supervised jumps working through a series of advanced exercises, that the student is asked to perform under their canopy. During the course the student will perform each exercise at least once so each exercise is understood.

High performance landing modules are completed including, the language of the swoop; priorities of progression, flight modes and managing performance objectives.

[Competition Techniques Course – 3 days]

A minimum skill level and experience is required for this course. Please contact info@safeflightschool.com for details.

The Competition Techniques Course introduces the student to advanced accuracy, high performance landings, flying through a course and specific competition techniques for current FAI Canopy Piloting Events.

The practical section of the course consists of 10 supervised jumps working through a series of competition exercises.

Competition Technique modules are completed including, understanding the rules, event strategy and techniques, and managing performance objectives.

[One to One Coaching – per day]

The school also offers specific one to one coaching, with the coach of your choice. Throughout the year Guest Coaches visit the Safe Flight School, Empuriabrava. All one to one coaching is subject to availability. Please see the website www.safeflightschool.com for specific details and dates.
